

Communication Line Protection

Powervar's Next Generation N5-2 Communication Line Protector (CLP) offers a leading-edge technology which provides a patented "Transient Blocking" and switch grade fail short device combination. The N5-2 Series protects circuits by rapidly switching to a blocked state. This technology balanced with over voltage, fast resettable sneak current protection and low surge let through provides the best level of protection for high speed communications lines and equipment.

Applications: Use with standard analog or digital telephone sets or lines, POTS, Trunks, ADSL and OPX cables.

Installation: Direct connect (plug into) existing 110 5 PIN type type connection block. Each module contains protection circuit for one 2-wire communications circuit.

Characteristics – Model Number N5-27-TBK-2

Test Methods per IEEE C62.31, UL 497, CSA C22.2, Telcordia GR 1361 and applicable sections of Telcordia GR 974.
